

Information for parents by school management
Daily structure during the period of distance learning

23 March 2020

Dear parents

We would be pleased to inform you about the recommendations made today, which are intended to provide a day structure for the students, you as parents, but also the teachers during the time of distance learning.

- ✓ Regulated daily structure in the morning: during 3 to 4 hours the school tasks should be completed.
- ✓ Learning content: not just repetition, but continuing to work according to the annual plan, possibly in a reduced form.
- ✓ Afternoon: creative, creative and active indoor activities.
- ✓ Daily time slot from 9 a.m. to 11 a.m.: the class teachers are available for your child. Once a week a contact must be made by telephone.
- ✓ Orders from the specialist teachers (TTG, DaZ, Team-Teaching, foreign languages): are given to the pupils in consultation with the class teacher.
- ✓ Contact with school curative teachers: once a week by telephone with all the pupils entrusted to them, plus adaptation of the relevant school material.

Further measures will be decided during the spring holidays (14 to 24 April 2020).

Friendly greetings

Head of education and school management of the primary school Regensdorf
